Kolkata

No. SGW.272/84/P1/1 Vol.V.

Dated: 09-06-2014.

M/s. Urban Algonics JV,
32J, Sahitya Parisad Street,
2nd Floor,
Kolkata – 700 006.

Sub: Execution of IP enabled Train Monitoring
System on trial basis and free of cost at
Dankuni-Kamarkundu Section.

Ref: Your letter No. ER/Urban-Algonics/Rem
dated 13/05/2014.

In reference to your above letter, the performance of the IP based Train Monitoring System which was working on trial basis in between Dankuni to Kamarkundu since 21/05/2013 is certified as below:

The performance of this system initially had some glitches. Initially there was some problem in LAN establishment due to some loose Hardware end connection. LAN was fully established after the problem was solved. Other than that lack of consistent Local Power Supply resulted in abruptly shutting down of the system. The Server also crashed due to multiple power failures. The Server was repaired and the system was restored. Beside these, the system is running exceptionally well and has fully accomplished its objectives.
